## **DETAILED ACTION**

### ***Drawings***

Applicant's response has overcome the objection to the drawings under 37 CFR 1.84(p)(5).

### ***Specification***

Applicant is reminded of the proper language and format for an abstract of the disclosure.

The abstract should be in narrative form and generally limited to a single paragraph on a separate sheet within the range of 50 to 150 words. It is important that the abstract not exceed 150 words in length since the space provided for the abstract on the computer tape used by the printer is limited. The form and legal phraseology often used in patent claims, such as "means" and "said," should be avoided. The abstract should describe the disclosure sufficiently to assist readers in deciding whether there is a need for consulting the full patent text for details.

The language should be clear and concise and should not repeat information given in the title. It should avoid using phrases which can be implied, such as, "The disclosure concerns," "The disclosure defined by this invention," "The disclosure describes," etc.

The amended abstract of the disclosure is objected to because it includes legal phraseology ("means"). Correction is required.

### ***Claim Rejections - 35 USC § 112***

The following is a quotation of the first paragraph of 35 U.S.C. 112:

Art Unit: 3636

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claim 31 is rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the written description requirement. The claim(s) contains subject matter which was not described in the specification in such a way as to reasonably convey to one skilled in the relevant art that the inventor(s), at the time the application was filed, had possession of the claimed invention. The recitation "wherein said aperture is formed in a manner to prevent tampering with said retractor shoulder belt by an occupant seated behind the user of said seat belt system" represents new matter.

Claims 1-16 and 30 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention. The claims are replete with indefiniteness. Examples are as follows: In line 2 of claim 1, "the type" lacks proper antecedent basis. In claim 2, the recitation "said means such that said retractor and belt housing unit" is grammatically vague. In the last line of claim 14, it is unclear if "a seat belt retractor mechanism" is intended to be the same feature as the retractor previously set forth in claim 1. Section (b) of claim 30 appears to set forth redundant subject matter. Note at least "a shoulder belt retractor mechanism", "a section of shoulder belt", "a fourth

connector", and "an intermediate portion". The last line of claim 30 includes vague spelling. Note "said forth connector". The remaining claims are indefinite for at least the reason that each depends from an indefinite claim.

***Allowable Subject Matter***

Claims 17-29 are allowed.

***Response to Amendment/Arguments***

Applicant's response has been fully considered. Remaining issues are described in the above sections.

***Conclusion***

**THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
